Subject: Re: Status of carry over

After Final adoption, the amendments go through Executive Branch Review. 14 days for Dept. Planning & Budget then 14 days for Sec. Natural Resources. No time limit for Governor's office review. Within 14 days after Gov. approval, the amendment is then submitted to the Virginia Register for publication with a 30-day comment period. If the Gov's office reviews & approves quickly, I'd guesstimate a minimum of 3+ months before it gets sent to EPA.

How long after it appears before the Board for final adoption would EPA see it for review and action?

Cheryl...no more RAP meetings have been scheduled. Earliest conceivable time to appear before the Board for final adoption would be at the summer quarterly meeting in June of this year. Due to recent legislation passed by the VA General Assembly the ammonia criteria will be separated from the other issues (bacteria, cadmium, human health). The soonest ammonia could go back before the Board for final adoption would be December. Here's a link to a legislative summary for VA Senate bill 344 that blocks adoption by the Board until certain stipulations are met. --> <http://lis.virginia.gov/cgi-bin/legp604.exe?181+oth+SB344FER122+PDF>

David can you give me status of the carry over and any schedule of millstones. And if there are any RAP meetings planned? Anything we can do to help this along?
